Randomized Trial of Peanut Consumption in Infants at Risk for Peanut Allergy

CONCLUSIONS

The early introduction of peanuts significantly decreased the frequency of the development of peanut allergy among children at high risk for this allergy and modulated immune responses to peanuts. (Funded by the National Institute of Allergy and Infectious Diseases and others; ClinicalTrials.gov number, NCT00329784.)

Beloved peanut butter coated corn sticks contain 49% peanut butter!

Bariatric Supplements

Unique formula for post Bariatric surgery patients

The number of people suffering of overweight and obesity in the western world is constantly growing.

The U.S. National Institutes of Health recommends bariatric surgery for obese people with a body mass index (BMI) of at least 40, and for people with BMI 35 and serious coexisting medical conditions such as diabetes.

Today there are four different types of bariatric surgeries:

- Gastric Bypass (Roux-en-Y)
- Sleeve Gastrectomy
- Biliopancreatic Diversion with Duodenal Switch (BPD-DS)
- Gastric Banding

NEOLIFE
NEOPHARM GROUP

Research show that bariatric surgery candidates are at risk of developing vitamin and mineral nutritional deficiencies in the post operative stage, thus multi-vitamin intake is recommended.

According to physicians and specialists, vitamins for bariatric patients should come in either chewable or liquid form.

NeoLife, in cooperation with expert Bariatric surgeons, has developed a product with **unique formula** in an **innovative intake form** with a **great taste**.
